TROPHOBLASTIC TUMOURS

Comparative Review

Introduction

Nineteen papers on different clinical aspects, diagnosis and treatment were presented at the XVth All-India Obstetric and Gynaecological Congress held at Goa on 27th December 1969. Twelve papers have been grouped together and reviewed by Bhaskar Rao. Two papers on chemotherapy have been grouped and reviewed by Paranjothy.

Because of their rarity three cases have been given in full, followed by two papers on diagnosis of trophoblastic tumours by hystero-graphy.
